

Neva Masquerade is only a synonym for Siberian Colorpoints and not recognized as a separate breed.

- **Body**

- The body is medium to large, larger animals are preferred. Rectangular format, not too long. Short, strong neck, broad chest. Legs in good proportion with well defined tufts. Tail not too long, broad at the base, not too pointed at the end.

- **Head**

- Head in good proportion to the body. Medium wedge shape with a slightly rounded chin area. Forehead somewhat domed. Clear bridge between the eyes. Width from the bridge to the nose leather. Cheek bones very broad, set deep. Whisker pads moderately pronounced. Cheek bones, whisker pads

- **Ears**

- Ears of medium size, set wide apart, more than the width of an ear between the ears.

- **Eyes**

- Eyes slightly oval, set level. All colors between yellow and green are allowed.

- **Coat**

- Coat of a uniform length, firm thick covering hair. Undercoat dense and plentiful. Ruff and trousers long. The color pointed cats (so-called Neva Masquerade) may be in tabby with or without white markings in a harmonious pattern.

- **Color**

- All Solid and Tabby inclusive Point-Varieties. Chocolate, Lilac, Cinnamon and Fawn not recognized. Each white spotting is allowed. Point-Varieties without white to be preferred. All recognized colors may appear with tabby markings, without Abyssinian ticked tabby marking.

- **Points**

Body	35 points
Head	30 points
Coat	25 points
Color	05 points
Condition	05 points

proportion to the body, of medium length, strong feet round

between the forehead and the nose. Nose of exactly the same
width as the mouth. Lips and chin form a gently rounded line.
